EXTRA CENSUS BULLETIN.

No. 14.

WASHINGTON, D. C.

October 28, 1891.

STATISTICS OF FARMS, HOMES, AND MORTGAGES. KANSAS.

DEPARTMENT OF THE INTERIOR,

CENSUS OFFICE,

WASHINGTON, D. C., October 5, 1891.

SIR :

The bulletin herewith presented shows the number of mortgages placed on record during the 10 years 1880-'89 in Kansas and the amount of said indebtedness. Tables are also presented showing the actual existing indebtedness, interest rates, classified amounts of loans, and other facts relating to the mortgage indebtedness of the state. According to the results obtained direct by the agents of the Census Office from the official records of the municipalities and counties of the state, it appears that a recorded real estate mortgage debt of \$482,699,640, excluding state and railroad land contracts, was incurred in Kansas during the 10 years 1880-'89, a large portion of which has been paid. Of this, \$343,268,234, or 71.11 per cent of the total, incumbered "acres", which are almost entirely agricultural real estate, and \$139,431,406, or 28.89 per cent, incumbered "lots", or village, city, and other real estate. The total number of mortgages recorded during the 10 years was 620,049, of which 415,622, or 67.03 per cent of the total, were on acres and 204,427, or 32.97 per cent, were on lots.

The existing debt of the state of Kansas (January 1, 1890) secured by real estate mortgage, aside from state and railroad land contracts, as shown by this investigation, aggregates \$235,485,108. The methods adopted by the Census Office to ascertain existing debt have been heretofore fully explained (Census Bulletin No. 5, May 15, 1890, and Extra Census Bulletin No. 3, April 22, 1891), and I have not deemed it necessary to go over this ground again, as these explanations will appear in the final volume relating to the statistics of farms, homes, and mortgages. Of the total amount of existing debt thus returned, \$167,145,039, or 70.98 per cent, is on acres, or almost exclusively farms, and \$68,340,069, or 29.02 per cent, on lots.

The letterpress prepared by Messrs. GEORGE K. HOLMES and JOHN S. LORD, special agents in charge of this work, brings out many interesting and important facts, showing the rates of interest, the average life of mortgages, and the purpose for which the debt was incurred. From the accompanying tables and other official data the following statement has been compiled :

Percentage of estimated true value of all taxed real estate, including improvements (not including railroad real estate), represented by the debt in force.....	27.25
Percentage of estimated true value of all taxed acres, including improvements (not including railroad real estate), represented by the debt in force against acres.....	28.00
Percentage of the estimated true value of all taxed lots, including improvements (not including railroad real estate), represented by the debt in force against lots.....	25.57
Percentage of the total number of taxed acres represented by the number of mortgaged acres.....	58.24
Percentage of the estimated true value of the mortgaged acres, including improvements, represented by the debt in force against acres.....	48.07
Average amount of debt in force per assessed acre.....	\$3.87
Average amount of debt in force per mortgaged acre.....	\$6.65
Average number of acres covered by a mortgage in force.....	130
Average value of a mortgaged acre, including improvements.....	\$13.83
Average amount of debt in force to each mortgage in force.....	\$860.96
Average estimated true value of acre real estate, including improvements, covered by each mortgage in force.....	\$1,797.90

These results are consistent with what is otherwise known of the affairs in Kansas, and they confirm the accuracy of the investigation in that state. Of the total debt in force against acres, 34 per cent is on real estate in

the western half of the state, where values are low and where settlement was made but a few years ago, largely upon public land. This has a great effect on state averages based on value. The debt in force per capita is \$165 and per family of 5 \$825, but these ratios are not sound because of many nonresident owners of mortgaged real estate. The recorded debt of the state of Kansas decreased 42.49 per cent from 1887 to 1889.

In examining the motives it will be found that purchase money, improvements, and business were the inducements for incurring 56 per cent of the existing debt in Decatur county, 80 per cent in Jefferson county, 75 per cent in Lincoln county, 75 per cent in Lyon county, and 82 per cent in Pawnee county. The proportion of debt incurred for business purposes is very small, generally less than 7 or 8 per cent. It is safe to say that fully three-fourths of the debt of Kansas was incurred for purchase money and improvements.

The question as to how much of the indebtedness in force is held by residents of the state has been frequently asked, but many obstacles prevent a complete answer, except in the "inquiry" counties. The following table shows the mortgages in force made to residents of the state, not including mortgage companies and loan agents:

COUNTIES.	Number.	Amount of debt.	PERCENTAGE OF TOTAL.	
			Number.	Amount.
Decatur.....	793	358,129	34.60	32.58
Jefferson	909	690,006	61.17	52.39
Lincoln.....	671	452,479	30.04	26.73
Lyon	1,686	1,312,512	44.16	38.13
Pawnee	1,078	743,540	58.87	47.10
Average.....	1,027	711,333	45.77	39.39

These counties, I think, fairly represent the holdings in the state of Kansas, and show that forty-five per cent of the indebtedness thereof is held by residents.

The relation of the mortgage indebtedness to the true value of property is an element that should not be ignored in estimating the burden of the debt. Mr. Henry Gannett, geographer, and special agent of the Tenth Census, after a thorough investigation, placed the true value of all property in the state in 1880 at \$760,000,000. The assessed valuation of taxable property, real and personal, including railroads, in the state of Kansas in 1880, as published in the reports of the Tenth Census, was \$160,891,689. The like assessed valuation for 1890 is \$348,459,944. Assuming that the ratio between the true and the assessed valuation in 1880 should be the same as for 1880, the true valuation of all property for 1890 would be \$1,646,000,000.

The estimate of true valuation for 1880 was made by Mr. Gannett after searching inquiry and a careful investigation of the completed statistics of wealth collected by the Census Office for that year. Such statistics for 1890 have as yet been only partially tabulated, and the replies to inquiries, of which thousands have been received, have not yet been brought together in available form. There is, however, considerable information at hand concerning the true value of property in Kansas. The governor of that state, in reply to an inquiry from this office as to the relation between the assessed valuation of property in his state and its true valuation, states in a letter of the 26th ultimo: "In this state I am satisfied that the assessed valuation of real and personal property does not exceed 25 per cent of the real valuation, and in this the secretary of the state board of agriculture and auditor of state concur".

The several county clerks of the state have rendered to the Census Office reports of assessed and estimated true valuation of property by minor divisions in their respective counties, and their average estimates of true value confirm the estimate of the state officers. Assuming that the assessed value of the property of the state is 25 per cent of the true value, as agreed by the state and county officials, the total value of assessed property in the state would be \$1,393,839,776; but this does not represent the true value of all property in Kansas. There is in addition the property exempt from taxation and taxable property escaping taxation. If the estimate of total true valuation, \$1,646,000,000, is correct, then the value of the exempt and that escaping taxation would necessarily be \$252,160,224.

As to the former class, the state constitution of Kansas exempts from taxation all property used exclusively for state, county, literary, educational, scientific, religious, benevolent, and charitable purposes, and personal property to the amount of at least \$200 for each family. A number of these values are known as follows:

For educational purposes, lands and buildings.....	\$10,617,151
School funds and contracts.....	10,546,635
Church property.....	8,801,870
State institutions.....	5,779,739
In all.....	35,745,395

There were also in the state in 1890, as shown by the figures of this office, 297,358 families entitled to the exemption named. This exemption, however, is of valuation as assessed, which, as before stated, is not more than one-fourth of the true value, thus giving to each family \$800 of personal property (some authorities claim it is nearer \$1,000) on which no tax is paid. Assuming this amount, however, to be but \$800, there would arise \$237,886,400 additional exempt property, which, in connection with the other amount stated, gives a total of exempt property in the state of \$273,631,795, nearly \$22,000,000 in excess of that required to make up the total estimate arrived at in the first instance and based on the census returns of 1880. The estimate of \$1,646,000,000 as the true value of all property taxed and not taxed for the state of Kansas is warranted by the facts. The mortgage indebtedness of the state, aggregating as it does \$235,485,108, would therefore be 14.31 per cent of the true valuation of all property in the state.

In this estimate no account is taken of taxable property escaping taxation, which in all communities is known to be considerable.

ROBERT P. PORTER,
Superintendent of Census.

THE SECRETARY OF THE INTERIOR.

STATISTICS OF FARMS, HOMES, AND MORTGAGES.

BY GEORGE K. HOLMES AND JOHN S. LORD.

THE REAL ESTATE MORTGAGES OF 10 YEARS.

This bulletin contains some of the results of the investigations of recorded indebtedness in Kansas, made under authority of the census act. In Table 1 it appears that a recorded real estate mortgage debt of \$482,699,640, excluding state and railroad land contracts, was incurred in Kansas during the 10 years 1880-'89, a large portion of which has been paid. Of this \$343,268,234, or 71.11 per cent of the total, incumbered "acres", which are almost entirely agricultural real estate, and \$139,431,406, or 28.89 per cent, incumbered "lots", or village, city, and other real estate. Mortgages not stating amount of debt are included in no totals unless so represented.

The total number of mortgages recorded during the 10 years was 620,049, of which 415,622, or 67.03 per cent of the total, were on acres and 204,427, or 32.97 per cent, were on lots. These do not include the interest and commission mortgages which were given to loan agents, and which are converted into additions to the rates of interest borne by the first mortgages. 342 mortgages do not state amount of debt.

The yearly totals exhibit the fact that in 1880 the amount of recorded mortgages was \$18,625,284; in 1881, \$21,343,449; in 1882, \$22,410,819; in 1883, \$27,697,409; in 1884, \$39,579,854; in 1885, \$53,203,287; in 1886, \$76,259,403, and that the amount culminated in 1887, with \$97,520,069. The decline was to \$69,977,822 in 1888 and to \$56,082,244 in 1889.

Mortgages to the number of 34,774 were recorded in 1880, 35,161 in 1881, 33,496 in 1882, 37,958 in 1883, 50,091 in 1884, 71,474 in 1885, 97,195 in 1886, and the highest number was reached in 1887, when 110,500 were recorded. In 1888 there was a decrease to 87,147, and in 1889 to 62,253.

Of the amount of mortgages recorded in the state during the 10 years, 26.29 per cent was in the counties of Sedgwick, Shawnee, and Wyandotte, containing, respectively, the cities of Wichita, Topeka, and Kansas City, and in the counties of Cowley, Dickinson, Reno, and Sumner, and these 7 counties have 18.31 per cent of the population of the state.

In 1880 the amount of mortgages recorded against acres in the state was \$15,425,775; in 1881, \$17,514,735; in 1882, \$17,634,017; in 1883, \$21,463,123; in 1884, \$31,241,851; in 1885, \$42,115,311; in 1886, \$56,724,122; and the largest amount, \$61,277,479, was in 1887, from which year the amount decreased to \$44,865,279 in 1888 and to \$35,006,542 in 1889. The number of mortgages recorded against acres shows a similar movement, except that the highest number, 67,111, was in 1886. The amount of mortgages against lots began the period with \$3,199,509 in 1880, increased to \$36,242,590 in 1887, and fell to \$21,075,702 in 1889. The number of mortgages recorded against lots shows the same rise and fall.

During the 10 years 53,768,190 acres were covered by mortgage, the increase being from 3,602,149 in 1880 to 8,691,343 in 1886, from which time there was a decline to 4,683,067 acres in 1889. The number of lots incumbered during the 10-year period was 530,865, and the annual tendency was from 17,031 in 1880 to 121,453 in 1887, after which the number fell to 74,918 in 1889. Acres and lots covered by mortgages not stating amount of debt are included in these totals.

The average mortgage during the 10 years was \$778.49; for acres, \$825.91; for lots, \$682.06. The average number of acres to a mortgage was 129.30; lots, 2.60; while the average amount of incurred indebtedness per acre created during the period of 10 years was \$6.39 and per lot \$262.80.

EXISTING INDEBTEDNESS.

Almost the entire existing real estate mortgage debt of Kansas was created during the 10 years 1880-'89, and the chief portion of it during the latter half of that period. The census day for this purpose being understood to be January 1, 1890, the total existing debt of the people of the state secured by real estate mortgage, aside from state and railroad land contracts, is shown in Table 2 to be \$235,485,108, of which the debt on acres, or almost exclusively farms, is \$167,145,039, or 70.98 per cent of the total, and the debt on lots is \$68,340,069, or 29.02 per cent of the total. There is a per capita existing debt of \$165. In the following 7 counties 27.88 per cent of all the existing debt of the state is owed: Cowley, Dickinson, Reno, Sedgwick, Shawnee, Sumner, and Wyandotte. These counties have 18.31 per cent of the state's population. In Sedgwick county, containing Wichita, where real estate speculation was very active a few years ago, the debt is \$16,583,053, and this is a higher amount than is shown for any other county. Wyandotte county, containing Kansas City, adjoining Kansas City, Missouri, is second, with

\$12,629,936, and Shawnee county, containing the capital of the state, stands third, with \$11,982,090. In these counties, possessing 10.32 per cent of the state's population, the existing debt is 17.49 per cent of the total debt of the state.

Considerable land has been sold on credit in Kansas by the state and by the railroads that have received government grants. The practice has been to allow the purchaser to take possession of land upon the payment of a nominal sum in cash, with the agreement that he shall receive a deed upon full payment of the purchase price. These contracts are not on record in the county offices, and as they are regarded as equivalent to mortgages it has been necessary to send special agents to the state and railroad officers having the custody of the contracts and of records where account of them is kept. The tabulation of the abstracts of the county records was nearly done before the abstracts of the state and railroad contracts had been made, and on account of the public desire to see the mortgage statistics proper for Kansas at the earliest possible moment the tables published do not include the contracts, with the exception of Table 5, where the addition could be quickly made. The state contracts represent an existing debt of \$3,667,735; the railroad contracts, \$3,993,983; total, \$7,661,718. The existing contract debt on acres is \$7,575,032; on lots, 886,686. Adding these totals, the grand total existing real estate mortgage debt of Kansas is \$243,146,826, of which \$174,720,071 is on acres and \$68,426,755 on lots.

The average life of a mortgage in Kansas is 3.322 years; of a mortgage on acres, 3.583 years; on lots, 2.764 years. In the eastern half of the state the average life of a mortgage is slightly longer than in the western half. The proportion of partial payments of the original amount of mortgages in force is much greater in the eastern half than in the western. The average of partial payments for the whole state is 5.09 per cent; on acres, 4.07 per cent; on lots, 7.50 per cent.

INTEREST RATES AND CLASSIFIED AMOUNTS OF LOANS.

Table 3 presents the interest rates borne by the mortgages recorded during the 10 years. The amount subject to 10 per cent was 28.52 per cent of the total amount recorded in that period; the amount subject to 8 per cent was 28.04 per cent of the total; the amount subject to 9 per cent was 21.13 per cent of the total, and the amount subject to 7 per cent was 9.71 per cent of the total. Interest rates of 10 per cent and over were paid on 36.10 per cent of the total recorded debt of the 10 years, and rates above 12 per cent were paid on 0.08 of 1 per cent of the total. During this period up to May 25, 1889, the law forbade a higher rate than 12 per cent, but it has been regarded as legally permissible for loan agents to take second and third mortgages to secure additional rates of interest under the name of commissions, and often with the understanding that they are additional rates. Such mortgages bear no interest before maturity, and have been rightfully excluded from the principal of the debt and included in the rates that are exhibited.

It is shown in Table 4 that the mortgages for \$500 and under \$1,000 constituted the largest proportion of the total number of mortgages recorded during the 10 years, the proportion being 30.40 per cent; 12.37 per cent were in the class of \$300 and under \$400, and 12.07 per cent in the class of \$200 and under \$300; 76.56 per cent of the total number of mortgages were under \$1,000, and 0.28 of 1 per cent were for \$10,000 and over. 11 mortgages were for \$100,000 and over.

SPECIAL INVESTIGATIONS.

In Decatur, Jefferson, Lincoln, Lyon, and Pawnee counties special investigations were conducted, and by means of inquiries addressed to debtors, property owners, and others in regard to every mortgage uncanceled of record the results presented in Table 5 were obtained. State and railroad contracts are included in this table.

Decatur is an agricultural county in the northwestern part of the state where crops have failed for several years, and its population is 8,414. The debt of this county is \$1,099,223, and the number of mortgages in force is 2,289; average debt in force per mortgage, \$480. The debt of Jefferson county, in the northeastern part of the state, is \$1,317,029, secured by 1,486 mortgages, with an average debt of \$886 per mortgage. Its population is 16,620. Lincoln county is near the middle of the state, and its residents are represented to have suffered through several crop failures. Its debt is \$1,692,940; the number of mortgages in force is 2,234, and the average debt to a mortgage is \$758. The mortgages in force in Lyon county, situated in the eastern part of the state, are securing a debt of \$3,442,133, at an average debt of \$902 to a mortgage. The population is 23,196. In the western part of the state, Pawnee county, with a population of 5,204, owes \$1,578,666 on 1,831 mortgages, the average debt to a mortgage being \$862.

The purchase of the mortgaged and other real estate, improvements and business, when not combined with other objects, were the inducements for incurring 56.29 per cent of the original amount of the existing mortgage debt in Decatur county, 80.25 per cent in Jefferson county, 75 per cent in Lincoln county, 75.17 per cent in Lyon county, and 81.61 per cent in Pawnee county. A considerable portion of the debt was incurred for these objects in combination with other objects, and in such case is inseparable from them. Farm and family expenses were a frequent object of indebtedness, but they are more or less combined with the objects of real estate purchase, improvements, and with others.

TABLE 1.—SUMMARY, BY YEARS, OF NUMBER AND AMOUNT OF REAL ESTATE MORTGAGES PLACED ON RECORD AND NUMBER OF ACRES AND LOTS COVERED.

[These mortgages do not represent the total debt in force, as many have been paid.]
